Every model: full specifications, battery options, features and packing data.

About VOSIDO

Factory-direct light electric mobility

Who we are

VOSIDO designs, manufactures and exports light electric mobility: electric scooters, electric bicycles, dirt and pit bikes, kids ride-ons, hoverboards and drift karts. Our catalogue spans seven series and 62 models, one supplier for the whole price ladder from 8.5-inch folding commuters to 12-inch dual-motor citycoco machines.

How we work

We build in-house, so there is no intermediary margin between you and the production line. Standard models ship as samples within seven working days and reach mass production 25-45 days after deposit. OEM and ODM programmes start at 100 units per model, with logo printing, colourways, carton artwork, manuals and display packaging all part of the service.

Certification and documentation

Every model is developed against the relevant standards and carries CE, RoHS, FCC and UKCA as applicable. Market-specific documentation is prepared per shipment, together with battery transport reports and container-loading data for every SKU.

How to use this catalogue

Each series opens with a divider, then every model gets a full page with the photograph, specification table, battery options and packing data. Use the model code (for example VS-E09) when you request a quotation or a sample.

VS-E09

City E-Scooters

A 14-inch city commuter e-scooter with a 500 W motor, 36 V battery and a front basket ? a stable, practical ride for daily errands and short commutes.
